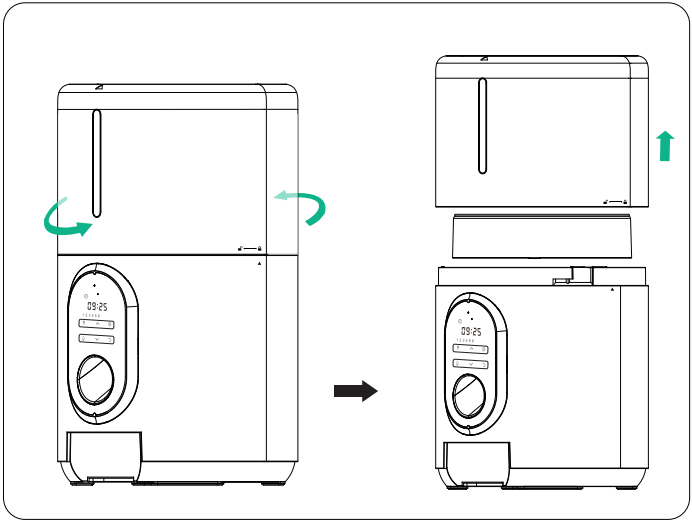
Hardware Installation

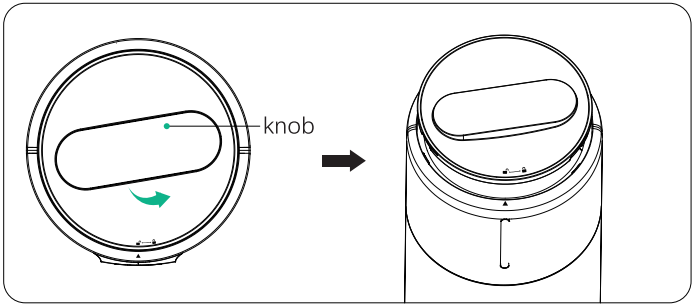
1 Take off the bowl

- Rotate the food tank counter-clockwise, and then lift the barrel at the same time, remove the food tank, and take out the Type-C charging line, desiccant, instruction manual, etc.



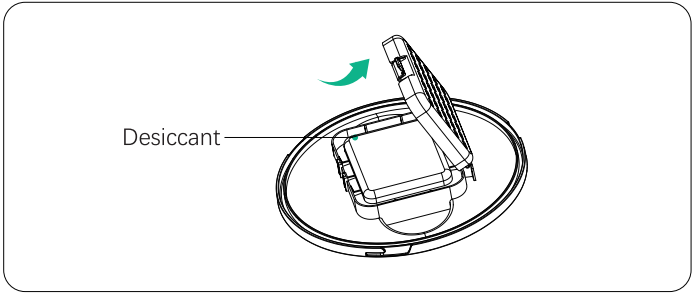
2 Remove the lid

• Turn the lid counterclockwise, lining up the arrows, then lift lid up.



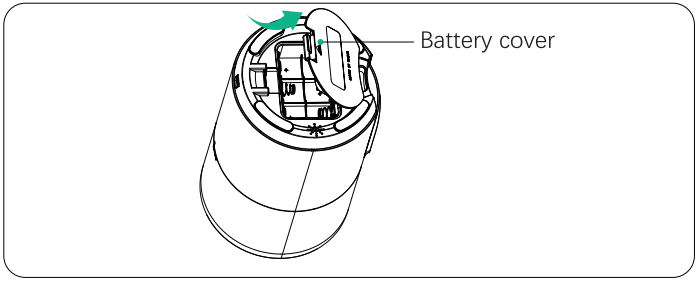
3 Load in desiccant

• Open the desiccant cap, put in the desiccant, and then close.



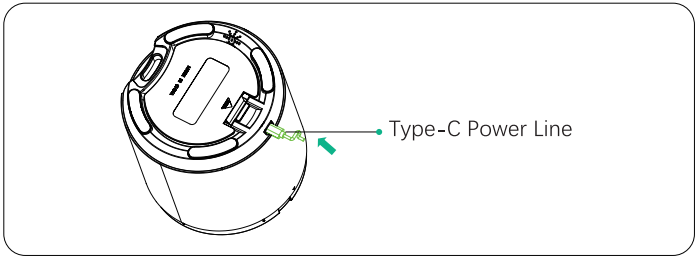
4 Install the battery

• Open the battery cover upward , put in 3 D-type batteries, and close the battery cover after loading



5 Insert power cable

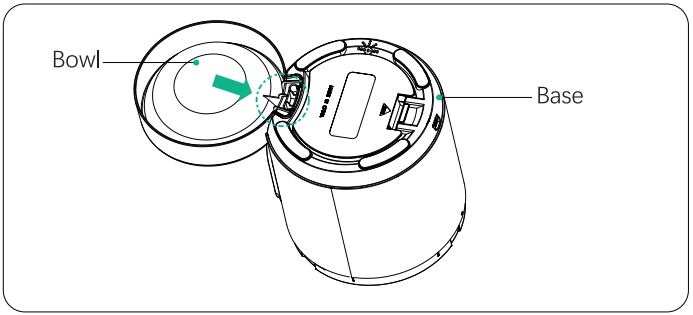
• Insert the Type-C power cable oriented



Notes: Although it is not necessary to use both modes at the same time, it is recommended to use both modes in order to prevent the feeder from losing power during any power interruptions

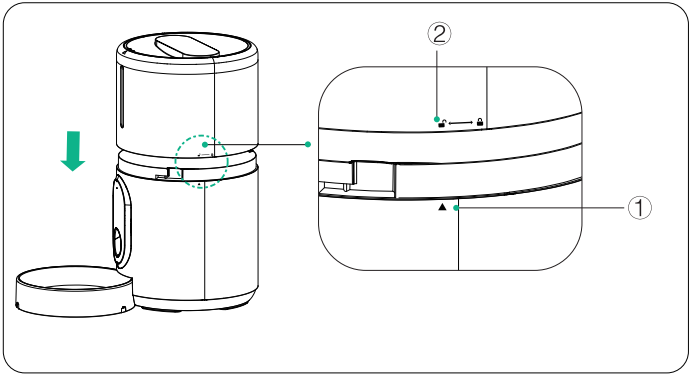
6 Install the bowl

• Put the bowl into the base

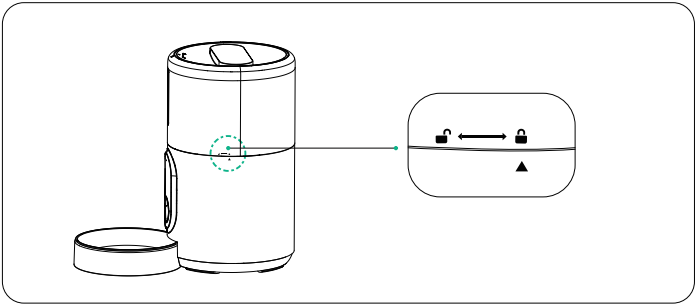


7 Install the food tank

• Follow the pictured arrow, align the ① with the body ②

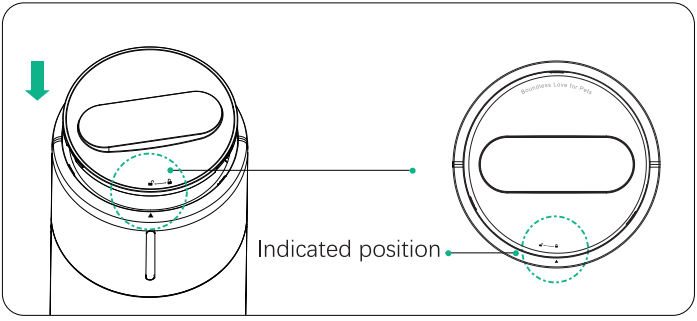


• Install from the top down, and then rotate clockwise.

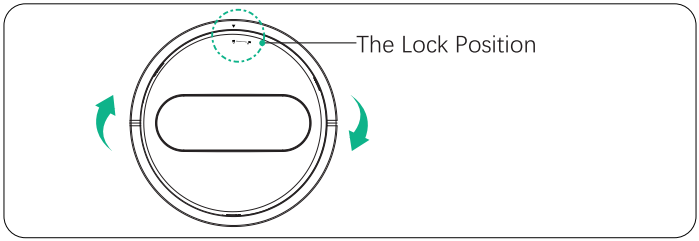


8 Install the cover

• First, align the arrow on the tank to the "unlocked" icon on the lid Next, turn the lid clockwise to lock the lid. align the arrow on the tank to the" locked" icon on the lid.

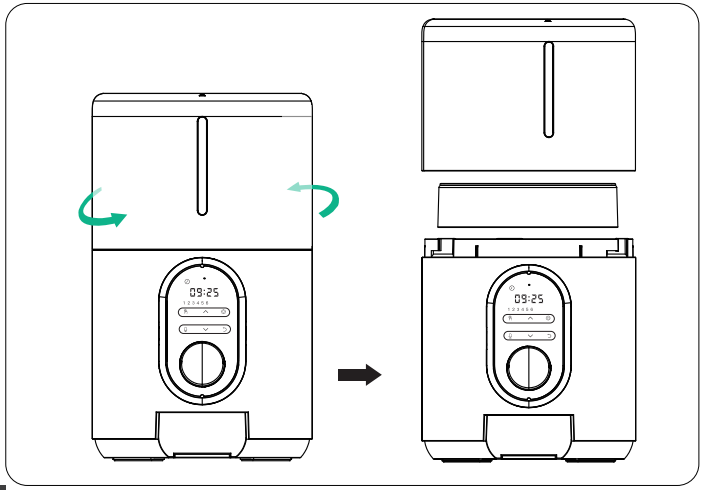


• Load into place, and then twist the knob to lock the lid



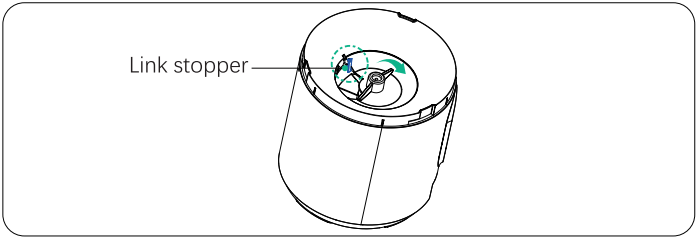
9 Cleaning the food tank

• Rotate the food tank counter-clockwise, then lift it up, and remove the food tank.

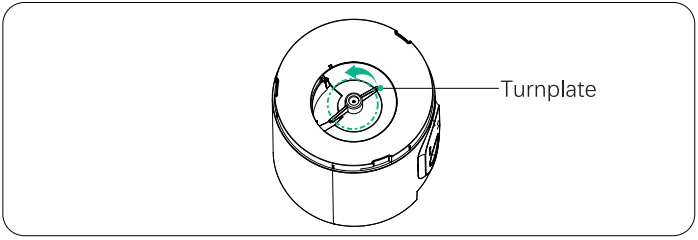


10 Cleaning the rotate plant

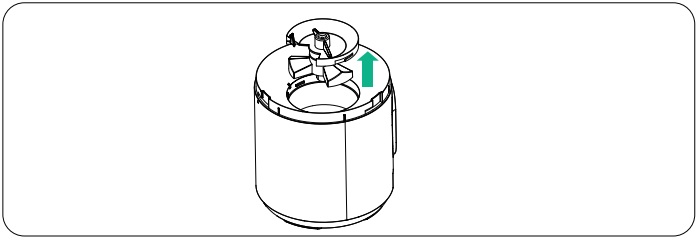
- Release Link stopper from the fuselage.



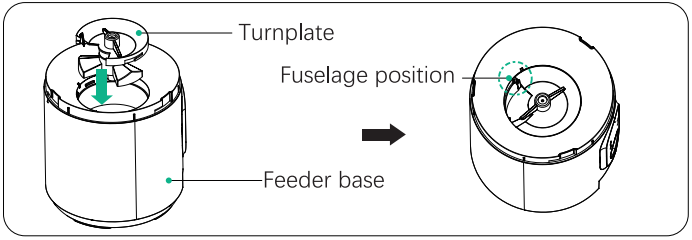
- Turn the turntable counterclockwise



- Lift the turntable up and take out the turntable



- Install the turnplate, putting the turnplate into the fuselage Feeder base. Align the turntable with the fuselage position indicated, and then place turntable into the fuselage.



- Put the turntable into the fuselage. Turn the turntable clockwise to the locked position and buckle the baffle into the fuselage slot

FAQs

Q: Why the motor runs but no food comes out?

A: Please make sure the removable parts installed into the feeder correctly. For more information, please refer page 10-11.

Q: Why the motor runs reversely?

A: When the food gets stuck, the motor will run reversely to solve the food stuck problem.

Q: Why the feeder shows low battery but the battery is new?

A: Some rechargeable batteries have low voltages, and the feeder may give false message. Please ignore or replace ordinary non-rechargeable batteries.

Any more questions, please email our support team:
